

## Charging the MiLi Power Pack

Use the included USB cable to charge the MiLi power pack. Connect the mini USB end to the input labeled as “IN” on the MiLi. Connect the other end of the cable to a USB 2.0 or 1.1 compatible power source outlet.

## Charging external devices with the MiLi

You can use the port labeled as “OUT” on the MiLi power pack to charge most external USB devices. To use, just connect the devices USB cable into the “OUT” port and it will charge your device using the MiLi battery. This is perfect for charging devices like a bluetooth headset while on the move.

## Battery LED indicator lights

Press the MiLi power button to display the charge indicator lights. The lights will show you the percentage of remaining battery life in the MiLi power pack. Read the blue LED indicator lights from left to right as follows:

- \* 1st LED on = MiLi Battery Charge is 0-25%
- \* 2nd LED on = MiLi Battery Charge is 25-50%
- \* 3rd LED on = MiLi Battery Charge is 50-75%
- \* 4th LED on = MiLi Battery Charge is 75-100%

## Charging Priorities

When the iPhone is connected to the MiLi power pack, the MiLi’s internal smart chip efficiently prioritizes power consumption. If the MiLi is connected to a USB power source, consumption comes first from this power source. When the MiLi is not being charged, the iPhone power consumption comes from the MiLi battery first until the MiLi’s remaining charge is less than 5 percent. When the MiLi battery is less than 5% charged, the internal iPhone battery power source is used. The iPhone battery power source is always used last so it can maintain its maximum charge.

Thanks to MiLi's smart chip you will extend your iPhone battery life by using it only when it's absolutely necessary. Feel like slimming down? Just disconnect the iPhone from the Mili and you will have a fully charged phone to take with you. Leave your MiLi to charge and re-attach at your will. With the MiLi, you never run out of iPhone battery life!

## Power Source Priority list

1. USB outlet power source
2. MiLi power pack battery
3. Internal iPhone battery

## Synching with iTunes

You can sync your iPhone with iTunes while it is still docked with the MiLi power

pack. There is no need to remove the MiLi battery from the iPhone when syncing with iTunes. Just use the included USB cable and connect to the computer you use with iTunes.

### MiLi Color Selection

The MiLi Power Pack is available in six different high gloss colors to choose from. Designed to compliment your black, white and silver iPhones, the MiLi comes with either a black or white base and your choice of inner lining. Select from the following colors:
